XPO Logistics Plans to Invest Up to \$90 Million in Road Fleet in North America

GREENWICH, Conn. - May 31, 2018 - XPO Logistics (NYSE: XPO), a leading global provider of transportation and logistics solutions, today announced plans to invest approximately \$90 million in 770 new tractors for its less-than-truckload (LTL) network in 2018. The company, which is the second largest LTL provider in North America, expects to integrate the new units into its fleet throughout the year.

Troy Cooper, president of XPO Logistics, said, "We're committed to giving our LTL drivers the latest technologies for comfort and safety. These new tractors also reflect our commitment to the environment by providing improved fuel efficiency and reducing emissions."

The new tractors will have 15-liter engines and 12-speed transmissions, replacing models with 13-liter engines. The larger engine is expected to offer a more optimal blend of performance, fuel economy, emissions characteristics and engine life, given the load profile of the company's LTL network. The units will also feature the latest safety technologies, including lane departure warning systems, adaptive cruise control and collision mitigation systems to assist drivers.
